FOLIA

Description:

Invite nature in With a thin frame and tripartite top, the table FOLIA is inspired by the shape of a clover. It's available in two heights and can be used on its own, but looks even better if you put several together in a cluster or arrange them to overlap. The design is light and airy, and the inspiration from nature is easily recognizable.

Year of design: 2015

Design: Charlotte Høncke

I graduated as an industrial designer from the Danish School of Architecture in 2002, but soon discovered that furniture design was my passion. I founded my own studio in Aarhus in 2010, where I design furniture, lamps and related products, mainly for the home. I like to combine functionality and aesthetics with small, surprising details. I always have a clear basic idea that is the starting point for the design, and then take a playful approach to the details with elements such as stitching, buttons, etc. There must be some details that make the furniture stand out. I like creating furniture that's unpretentiously cozy and humorous.
